

Christmas Puppet Craft

Boofle™
xxx♥

Things you will need:

x1 A4 thin white card, scissors, children plastic needle, x4 4mm split pins, piece of bakers twine or cotton for the pulling mechanism, an adults help.

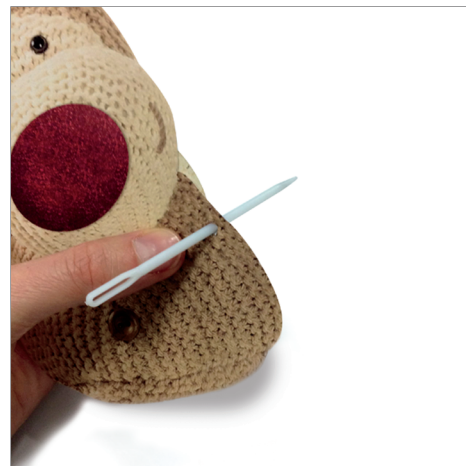

How to make:

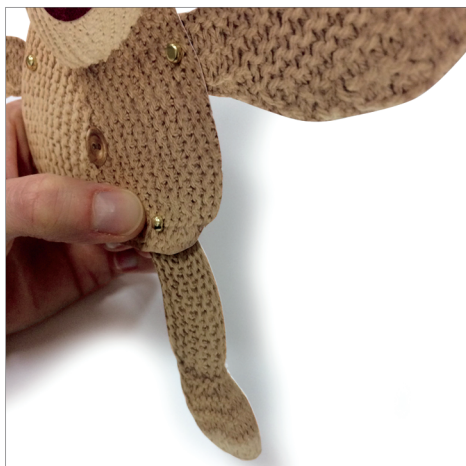

Items you will need.

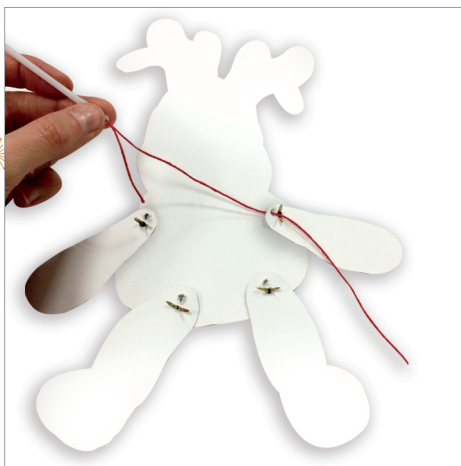

1 - First, print the boofle puppet out onto the thin card and cut each piece out.

2 - Using the needle, pierce all the white and black dots. The white dots indicate where the pins go, the black, where the twine/cotton goes through.

3 - Loosely connect your arms and legs with your split pins. Ensure you connect the arms and legs to the back of the body.

4 - Thread your needle, making sure your arms are in the down position, guide the needle in through the top hole of the right arm and secure with a knot. Run the thread across in a straight manner to the other arm and feed the needle in through the front of the arm and secure with a knot. It's important that this isn't too tight (arms won't move) or too loose (legs won't move), it needs to be just right.

5 - Repeat step 4 with the legs.

6 - Add a connecting piece of thread between the arms and legs, securing in position with a knot, again ensuring the thread isn't too tight or too loose.

7 - Test your Boofle puppet, when pulling the thread gently the arms and legs should move.

8 - Once your happy with your puppet you can add some twine or thread to the top of your puppet if you wish, enjoy.
